Your lung health check

Information for patients

The NHS have invited you for a lung health check because:

- you are 55 to 74 years old, and
- you smoke or used to smoke.

Please read this leaflet. This appointment is important.

If you have any questions, please talk to your GP.

Please follow this link for more information:

www.kentandmedwaycanceralliance.nhs.uk

A lung health check will check how well your lungs are working. It will also help find problems early, sometimes before you notice anything is wrong.

This appointment is very important. The earlier we find a problem, the easier it is to treat.

First appointments are with a nurse over the phone. If you want to have your appointment in person, please let us know. Our contact details are at the end of this leaflet.

You can bring a friend, family member or carer to your appointment.

The appointment takes about 30 minutes.

The nurse will ask you questions about your smoking and your health. They will also ask about your family's health.

The nurse will ask you how tall you are and what you weigh. Make sure you have this information ready for your appointment.

The nurse may talk to you about having a lung scan. A lung scan will check for early signs of lung cancer. If you decide to have a lung scan, the date and time of the scan will be sent to you by post or email.

Please ask the nurse any questions. If you are worried, please tell the nurse.
